

Student's declaration on the use of artificial intelligence in preparing thesis work

Name of the student

Family name:

Altendeitering

First name:

Lucca

Matriculation number:

03782307

Title of the thesis:

An Algorithmic Framework for Very Large-Scale Capacitated Vehicle Routing Problems

Chatbots using Large Language Models based on artificial intelligence (AI) such as OpenAI's ChatGPT or SchulKI, or Google's Bard have become easily accessible tools to support the academic writing process. Grading your work requires an assessment of what has been your own input to your text and how such models helped you. Please therefore complete and sign the following statements by ticking the boxes and add detail if applicable. Thank you!

Please mark as applicable:

- ☐ I have not used any AI tool in preparing this thesis
- ☒ I used an AI tool in the following areas (multiple answers possible):
- ☒ Finding ideas, stimulating my creativity
 - ☒ Understanding concepts, researching facts and definitions
 - ☒ Searching for and summarizing relevant literature
 - ☒ Generating and refining code for programming tasks
 - ☒ Optimising a text that I drafted myself
 - ☐ Creating entire text passages following my prompts

If you used an AI tool, please explain which parts of your text have benefitted from the tool and how.

- Latex formatting
- Structuring sections
- Spellcheck, grammar check, checking calculations
- Iterating text passages
- Discussing statistical methodology and interpreting results

This applies to most parts of the text.

I hereby confirm that I am fully aware of all contributions made by the AI tools used in the preparation of my thesis, that I have carefully reviewed the entire text for correctness following their use, and that I take full responsibility for the content.
